

**»His work is very detailed and precise... permanently searching for the true reasons, backgrounds and causes ... His work helps us to improve.«**

Mr. Dipl.-Ing. W.Lieb, department manager  
Abwasserbeseitigung Stadt Vaihingen/Enz, Germany

### **Any doubt?**

I take care for many different sewage plants.

Simply ask my customers for their experiences and their satisfaction.

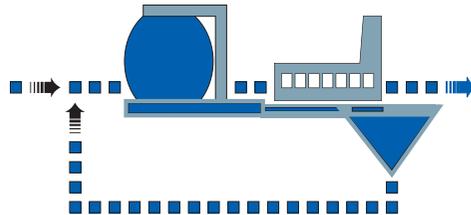

Do you have any need? I would be pleased to prepare for you a comprehensive and noncommittal offer, based on your requests and needs.

### **Just try me!**

On the occasion of an inspection date I offer you a short analysis of your unit, irrespective of your final decision.

I would be pleased to advise you. Together we will find the best solution for your company.

**Do not hesitate to call me!**  
I am at your service.

**Armin Meister**

Applikations- und  
Betriebsberatung

**»Für eine saubere  
Umwelt.«**

**»Is an economic, effective and safe sewage system important for you?«**

**Then the support of »Armin Meister Abwassertechnik« offers you the best solution possible for your company.**

The sewage engineering with its laws and guidelines is permanently rapidly developing.

Many operators, engineers as well as system integrators wonder which advantages the application of the newest techniques and technologies imply.

**Do not let this pressure overwhelm yourself.**

### My solutions

- are individually coordinated with the needs of YOUR unit and
- are characterized by efficiency, practice proximity and simplicity.

### I can help you

- to lower your operating costs,
- to increase the efficiency, the operating security and the availability of your plant.

**Please note:** High-tech or modern techniques are not always the best answer to your problems.

Based on many years of experience in the development, the building and, in particular, the operation of plants, I dispose of a broad and varied know-how and I am acquainted with the different view-points of all parties involved.

Beyond this, you can profit from my steady cooperation with specialized engineers, research institutes and authorities.

**And:** To advise also means to advise against something, to develop and to offer alternative solutions.

Expect me to analyze, to offer ideas and to bring in different solutions from the sum of all my experiences.

Be sure that my suggestions will be of proven practicability and function.
